

Haverhill School Committee  
Policy JLCCA

AIDS (ACQUIRED IMMUNE DEFICIENCY SYNDROME)

For one's own protection and the protection of others in the school system, all employees are to consider and apply the concept of universal precautions in the performance of their duties. Since the school department can access only that information which parents choose to provide to it as regards to the issue of children with AIDS, the Haverhill School Committee mandates:

1. the application of universal precautions on the part of all staff with respect to student health issues
2. periodic training of staff on these precautions
